You come to the meaningful interpretation text,

by noting the found term respectively the found word vertically so that there remains some space on the left side for the basic meanings of the individual letters. Then you ask to whom or to what the message relates to, and then try intuitively to formulate a text that contains all the basic meanings and additions in turn. You will receive a text - perhaps a bit cryptic - but it will make sense to you personally.

Note: Note: If a U is greek, then it is written as OY and means "decision".
